

WATCHMAN IKENNA OKORO

DEVOPS ENGINEER

Abuja, Nigeria | Remote Worldwide

watchmanokoro@gmail.com | linkedin.com/in/watchman-okoro-5164493ba | github.com/solfa1

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience designing, automating, and supporting cloud-native infrastructure on AWS. Skilled in Kubernetes, Terraform, Docker, CI/CD automation, monitoring, and Linux systems administration. Passionate about improving deployment reliability, observability, infrastructure security, and operational efficiency through Infrastructure as Code and automation practices.

AREAS OF EXPERTISE

- AWS Cloud Infrastructure
- Kubernetes, Docker & Container Orchestration
- CI/CD Automation (GitHub Actions, GitOps)
- Infrastructure as Code (Terraform)
- Observability (Prometheus, Grafana, Alerting)
- Linux Administration & Networking
- Incident Response & Reliability Engineering
- Security Hardening, IAM, TLS & Secrets Management
- Python, Bash & YAML Automation

PROFESSIONAL EXPERIENCE

DevOps Engineer | Occasio | Jan 2025 – 2026

- Improved platform reliability for systems serving 30K+ users by supporting scalable Kubernetes environments and applying monitoring, health checks, and deployment best practices.
- Reduced deployment friction and improved release consistency by maintaining GitHub Actions CI/CD pipelines and automating infrastructure workflows.
- Improved observability and troubleshooting by implementing Prometheus and Grafana dashboards to monitor latency, infrastructure health, and service performance.
- Strengthened infrastructure security by integrating IAM, TLS encryption, and secrets management into Infrastructure as Code workflows.
- Collaborated with engineering teams to improve infrastructure reliability, deployment speed, and operational visibility.

PROJECTS

Taskflow – Kubernetes DevOps Platform

Built and automated a production-style microservices platform using Kubernetes, Terraform, Docker, PostgreSQL, and Redis to improve deployment reliability and observability.

- Implemented Infrastructure as Code using Terraform for automated provisioning.
- Designed Kubernetes deployments, services, ingress, autoscaling, and configuration management.
- Built CI/CD pipelines using GitHub Actions for automated testing and deployment.
- Implemented monitoring and observability using Prometheus and Grafana.
- Applied security best practices including secrets management, network policies, and access controls.
- Simulated real-world cloud-native operations including scaling, monitoring, deployment automation, and incident troubleshooting.

TECHNICAL SKILLS

Cloud: AWS

Containers: Kubernetes (EKS), Docker, Helm

Infrastructure as Code: Terraform

CI/CD: GitHub Actions, GitOps, Git

Observability: Prometheus, Grafana, Monitoring & Alerting

Security: IAM, TLS/SSL, Secrets Management, Infrastructure Hardening

Operating Systems & Networking: Linux (Ubuntu/Debian), DNS, VPNs, Load Balancing, VPC

Scripting: Python, Bash, YAML

CERTIFICATIONS

CompTIA Security+

Issued May 2025 | Expires May 2028
Credential ID: 73686d37-5a47-4c9b-bb4b-bfa37de93048

EDUCATION

Kwame Nkrumah University of Science and Technology (KNUST)
GOMYCODE — Cybersecurity / DevOps
